Subject: RE: Region VI Hurricane Harvey SITREP 7_30 Aug 2017 12 PM CDT

Steve,

- 1) All my info is from Harris County FD. They have made a decision in conjunction with information from Arkema to prepare for one or multiple of the containers holding the peroxide material to auto ignite. They are maintaining a 1.5 mile evacuation radius and I do not have any other information at this time.
- 2) All we have from Aspect right now is the one photo (already sent to you). They are processing additional images and will get them to us asap but they did not detect any emissions coming off the facility.
- 3) The only transfer operations I'm aware of were putting material into the 8 containers of concern, not railcars but I can check. Thx.

Bill, are these questions something you can answer? Laura is our EPA rep at the NRCC

Page 12 of this report has an update from DHS on the ARKEMA Plant.

- 1) What do we have on this? FEMA Administrator wants to make sure that safety is sought after (evacuations were done yesterday), to control any media attention this may receive.
- 2) what do we have on aspect overflights of this? FEMA would like to see any aerial pictures of this site if we have them yet.
- 3) We have reports of the organic peroxides from this facility being moved onto rails—and questions: are they safe at the new location? Are they being monitored?

Thanks,

Laura
